Pilot trial evaluation interview

WP 4.2

The interview is designed to evaluate the effectiveness of the pilot experimentation of online training and the toolkits developed within the INTRA project, aimed at improving the psychophysical well-being of adults through the acquisition of transversal and digital skills.

The aim is to collect feedback on the three training modules concerning stress management, personal development and time management, as well as on the toolkits dedicated to guidance, counselling and soft skills.

Closed-ended questions will provide quantitative data on satisfaction and the perceived impact of training, while open-ended questions will provide an opportunity to explore in depth participants' experiences and opinions about the toolkits. This approach aims to identify strengths and areas for improvement, thus contributing to the continuous evolution of training programs.

Closed-ended questions

Module 1: Stress Management

1. How much do you think the module has helped you improve your ability to manage stress?
a) Not at all b) Little c) Quite a lot d) A lot [Correct answer]
